Special Issue: MOLECULAR INTERACTIONS AND RELAXATION IN LIQUIDS

Preface ix

The dynamics of solvation in polar liquids
M. Maroncelli (University Park, USA) 1

Microscopic theory of solvation of an ion in a binary dipolar liquid
A. Chandra and B. Bagchi (Bangalore, India) 39

Solute electronic structure and solvation in chemical reactions in solution
J.T. Hynes, H.J. Kim, J.R. Mathis and J. Juanos i Timoneda (Boulder, USA) . . 53

Dynamic polar solvent effects on proton transfer reactions
S.K. Ghosh (Bombay, India) 75

Ionic dissociation dynamics in a polarizable liquid
S.-B. Zhu, J.-B. Zhu, J. Lee, G.W. Robinson and Surjit Singh (Lubbock, USA) 91

Intramolecular charge transfer processes in restricted environments
K. Bhattacharyya (Calcutta, India) 115

Photoisomerization dynamics of stilbenes in polar solvents
D.H. Waldeck (Pittsburgh, USA) 127

Dynamics of barrierless reactions in condensed phases
V. Sundström and U. Åberg (Umeå, Sweden) 149

Role of molecular reorientation in the vitrification of molecular liquids: a Monte Carlo study of the liquid and glassy states of 2,2-dimethylbutane
A. Chakrabarti, S. Yashonath and C.N.R. Rao (Bangalore, India) 177

Magnetic field effect on exciplex luminescence in liquids
M. Chowdhury, R. Dutta, S. Basu and D. Nath (Calcutta, India) 195
